1STCHAPTER Entrepreneurship

The word 'entrepreneur' is derived from the French verb 'entreprendre', which meansto undertake. This refers to those who'undertake' the risk of new enterprises. An enterprise is created by an entrepreneur. The process of creation is called 'entrepreneurship'.

Entrepreneurship is a process of actions of entrepreneur who is a person always insearch of something new and exploits such ideas into gainful opportunities by accepting theriskanduncertaintywiththeenterprise.

NeedofEntrepreneurship:

1. <u>Developmentofmanagerialcapabilities</u>:

The managerial capabilities are used by entrepreneurs in creating new technologies and, products in place of older technologies and products, resulting in higher performance.

2. CreationofOrganisations:

Entrepreneurshipresultsintocreatingof organisations when entrepreneurs assembleandcoordinate physical, human and financial resources, and direct them towards achievement of objectives through managerial skills.

3. Improvingstandardsofliving:

(a)By creating productive organisations," entrepreneurship,helpsin makingvariety ofgoods. and services available to the society which results into higher standards of living forthe people (b) Possession of luxury cars, computers, mobile phones, rapid growth of shoppingmalls etc. are pointers to the rising living standards of people and all this is due to the effortsofentrepreneurs.

4. Meansofeconomicdevelopment:

Entrepreneurship involves creation and use of innovative ideas, maximisation of output fromgiven resources, development of managerial skill etc. and all these factors are so essential forthe economicdevelopmentofa country.

Characteristicsofanentrepreneur:

Herearethe 10 best characteristics of an entrepreneur that one must nurture.

1) Creativity:

Creativity gives birth to something new. Without creativity, there is no innovation possible. Entrepreneurs usually have the knack topin down alot of ideas and acton them. Notnecessarily every idea might be a hit. But the experience obtained is gold.

2) Professionalism:

Professionalism is a quality which all good entrepreneurs must possess. An entrepreneurs' mannerisms and behaviour with their employees and clients goes a long way in developing the culture of the organization.

3) Risk-taking:

Entrepreneurs have a differentiated approach towards risks. Good entrepreneurs are always ready to invest their time and money. But, they always have a backup for every risk they take. Withoutknowing the consequences, agood entrepreneur wouldn't risk itall.

4) Passion:

Passion acts, as a driving force, with which, you are motivated to strive for better. It also allows you the ability to put in those extra hours or efforts which may make a difference.

5) Planning:

Planning basically sums up all the resources at hand and enables you to come up with astructure and a thought process for how to reach your goal. The next step involves how tomake optimumuseoftheseresources, toweave the cloth of Success.

6) Knowledge:

A good entrepreneur always try to increase his knowledge which is why he is always alearner. Knowledge is the keytosuccess. An entrepreneur should possess complete knowledge of his industry. He should also know that his strengths and weaknesses are so that they can be worked on and can result in a healthier organisation.

7) Socialskills:

Socialskillsinvolverelationshipbuilding, hiringandtalentsourcing, teamstrategy formulation.

8) Empathy:

Empathy is the understanding of what goes on in someone's mind. A good entrepreneurshould knowthe strengthsandweaknessesofeveryemployeewhoworksunderhim.

9) <u>Customersatisfaction:</u>

A good entrepreneur will always know this; a business is all about the customer. How yougrab the customer's attention is the first step. This can be done through various mediums suchasmarketingandadvertising.

10) Self-motivation:

One of the mostimportant traits of entrepreneurs is self-motivation. When wantyou to succeed you need to be able to push yourself. You need to be dedicated to your plans andkeepmoving forward.

Qualities of an entrepreneur:

- 1-Self-confidence
- 2. Competitivespirit
- 3. Egoinvolvement
- 4. Egostrength
- 5. Risktaking
- 6. Decision

- 7. Independentthinking
- 8. Desireforunique production.
- 9. Managerialskill
- 10. Organising ability
- 11. Intelligence
- 12. Emotionaltolerance
- 13. Achievementorientation
- 14. Visualisationability
- 15. Goaldirectedthinking
- 16. Conflictresolved
- 17. Imaginativethinking
- 18. Popularity
- 19. Realityoriented
- 20. Cooperative
- 21. Qualitycontrolcapacity
- 22. Highmotivation

TypesofEntrepreneurs:

Entrepreneurscanbeclassifiedthroughvariousparameters. On the basis of economic development, there are 5 types of entrepreneurs.

- (1) Innovatingentrepreneur
- (2) Imitativeentrepreneur
- (3) Fabianentrepreneur
- (4) Droneentrepreneur
- (5) Socialentrepreneur

(1) Innovatingentrepreneur:

- \rightarrow These entrepreneurs have the ability to think newer, better and more economical ideas of business organisation and management.
- → Inventions like the introduction of a small car "NANO" by Ratan Tata, making mobilephonesavailabletothecommonmanbyAnilAmbaniaretheworksofinnovativeentrepreneur

(2) <u>Imitativeentrepreneur:</u>

- \rightarrow These entrepreneurs imitate innovative entrepreneurs and follow the paths hown by innovative entrepreneurs.
- \rightarrow Development of small shopping complexes, manufacturing small cars are now imitative entrepreneurs.

(3) <u>Fabianentrepreneur:</u>

- \rightarrow By nature these entrepreneurs are shy andlazy. These type of entrepreneurs are neitherwill to introduce new changes nor desire to adopt new methods of production innovated bymostoftheentrepreneurs.
- →Theyarenotinterestedintakingrisk.

(4) <u>Droneentrepreneurs:</u>

→ Drone entrepreneurs are those individuals who are satisfied with the existing mode and speed of business activity and show no inclination in gaining market leadership.

→ In other words, drone entrepreneurs are die hard conservatives and even ready to suffer thelossofbusiness.

(5) Socialentrepreneurs:

→ Socialentrepreneurs

drivesocialinnovationandtransformationinvariousfieldsincludingeducation, health, humanrights, worker'srights, environmentandenterprisedevelopment.

→ Dr. YunusofBangladeshwhostarted Gramin.Bankisacaseofsocialentrepreneur.

Functionsofanentrepreneur:

Someoftheimportantfunctionperformedbyentrepreneurareasfollows:

- 1. <u>Toprepareplan:</u> Planreferstoschemeofproduction, scale of production, types of goodstobe produced and its quantity.
- **2.** <u>Selectionofthesite:</u> Theselectionofplacemaybenearmarked, railway-stationofnearthesourceofrawmaterials.
- 3. <u>Provisionofcapital:</u> Capitalisrequiredtoinstallafactoryor anindustry.
- 4. <u>ProvisionofLand</u>: Landhasto bearrangedeither bypurchasing or hiring.
- **5.** <u>Provision of labour:</u> Differenttypes of labourarerequiredtoproduce onetypeofcommodity.
- 6. <u>Purchaseofmachinesandtools:</u> It is required to start and continue the production.
- 7. <u>Provisionofrawmaterials:</u> Entrepreneurshouldpurchasebestqualityofrawmaterialsatm inimumcost. Heshouldalsoknowthe sourcesofrawmaterials.
- **8.** <u>Coordinationofthefactorsofproduction:</u> It is required to reduce the cost of production to minimum.
- **9.** <u>Divisionoflabour:</u> The splitting upof production into different parts and entrusting them to different workers is also function of an entrepreneur.
- **10.** <u>**Quality of product:**</u> Keeping inview the competition in the market, the entrepreneur has to determine the quality of his product.
- 11. <u>Saleofgoods:</u>Heemploysagoodnumberofsalesmanto market thegoods.
- **12.** <u>Advertisement:</u> Hehastodoadvertisementofqualityofhisgoodsthroughnewspapers, mag azines.radio. TV etc.
- **13.** <u>Searchformarkets:</u> Heshouldproducegoodsinaccordancewithcustomer's tastes and exploremarkets for his product.

- **14.** <u>Supervision:</u> The main job of an entrepreneur is to supervise all the factors engaged production process.
- **15.** <u>Contact with the government:</u> A license shouldbe taken before the start of precaution. He has to a bide by certain rules and regulations of production and has to paytaxes regularly.
- **16.** Payment to factors of productions: He has to make payments to the landlord, labour, capitalist in the form of rent, wages and interest.
- **17. Quantity of production:** He determines the quantity of production keeping in viewthe demandforgoods and the extent of market.
- **18.** <u>Risk-taking:</u> There are chances that he may be rewarded with a handsome profit or hemaysuffer aheavyloss. Therefore, risk-bearing is the final responsibility of an entrepreneur.

Barriersinentrepreneurship:

(1) EnvironmentalBarriers:

- (a) Rawmaterial: Non-availability of rawmaterials can increase its price due to competition.
- (b) <u>Labour</u>: Itincludes short a geof skilled labour, lack of committed and loyal employees.
- (c) <u>Machinery:</u> Machinesaresometimesexpensive, and becomes difficult for the small organisation stoke epitheproduction process updated.

Industry:

Industry refers to those economic activities, which are responsible for the production ofgoodsandservices.

Dependinguponthenature, activities of industry, industry can be classified into 5 categories:

- (1) Manufacturing industry
- (2) Extractive industry
- (3) Geneticindustry
- (4) Constructionindustry
- (5) Service industry

(1) Manufacturingindustry:

Heretheproductionactivities are carried on at a particular place with the use of men and machine

Therearethefactories and mills where raw materials are introduced and finished products are found out.

Manufacturing industries are further classified into four categories:

- (a) Assemblingindustry
- (b) Processing industry
- (c) Analyticalindustry
- (d) Mixedtypeorsynthetictype
- (a) <u>Assemblingindustry:</u> This type of industries procures or purchase different components, parts, assembling, accessories and assemble them into use able products.

Ex:Bicycle industries, automobile industries, watchindustries, TV industries etc.

(b) Processing industry: This type of industries purchases different raw materials and areput into the processes. Under the arrangement, some type of processing, modifying, grinding, polishing, shaping, heating etc. are done at different stages at different processes with the aidofplant, machinery and equipment.

Ex: Furnituremaking, textile industries, papermaking, jutemill setc.

- (c) <u>Analytical industry:</u> This type of industries introduces raw material at one point andseveral products come out at different processes by due segregation, separation, analysis etc. <u>Ex:</u> Milk products like ghee, cheese, curd, butter, milk powder, condensed milk etc. come outofdifferent processes.
- (d) <u>Mixedtypeindustry:</u>Underthistypeofindustriesdifferentrawmaterialsarecombined at different processes or different stages and after further processing, finishedproductscomeoutattheendofprocesses.

Ex:Foodprocessingindustries, Ayurvedicmedicine preparation.

(2) Extractive industry:

This type of industries is engaged in the process of extraction of different minerals, collection of for extraction of different minerals, collection of the formal different minerals and different minerals.

(3) Geneticindustries:

(4) Constructive industries:

This typeof

industriesisengagedintheconstructionofvariousinfrastructurelikeroad,dam,bridge,canal,flyover,tu nnel,building,factories etc.

(5) Serviceindustries:

This type of industries provides services of various types to the people to the industries and other organisation.

Ex:Servicestation, garage, cinemahalls, internet, hospitaletc.

Conceptofstart-up:

- $\rightarrow A start-up is a young company founded by one or more entrepreneur sto develop a unique productor service and bring it to the market.$
- → Through a vast majority of start-ups fails, some of history's most successful entrepreneurscreated start-ups like Microsoft (founded by Bill Gates), Ford motors (founded by HenryFord), andMc.Donald's (founded by RayKroc).

Entrepreneurialsupportagencies: (National, State and districtle vel)

1) <u>DIC(DistrictIndustriesCentre):</u>

- →Itwasestablished on1stMay1978.
- → District Industries Centres by central program was initiated by central government topromote tiny, cottage, village and small scale industries (SSIs) in smaller towns and their particular areas to make them. available with all the basic needs, services and facilities.
- → DIC'sprimaryfocusisto generateemployment inruralregionsofIndia.
- → DIC perform various functions like arrangements for credit and machinery and equipmentandrawmaterials, development. and expansion of industrial clusters, identification of suit ables chemes, recognizing and financially supporting newent repreneurs.

2) <u>NSIC(NationalSmallIndustriesCorporation):</u>

- → National small industries corporation (NSIC) was established in the year 1955 in order topromote, aid and foster the growth of small business units in the country. The functions of NSIC areas follows:
- (a) Tocreateawarenessabouttechnologicalupgradation.
- (b) Toserveastechnologybusiness incubators.
- (c) Toprovidementoringandadvisoryservices.
- (d) Todeveloptechnologytransfer centresand softwaretechnologyparks.
- (e) Toobtain, supply and distribute in digenous and imported rawmaterials.
- (f) Toexporttheproductsofsmallbusinessunits inordertodevelopexportworthiness.

3) OSIC(OdishaSmallIndustriesCorporation):

- →TheOdishaSmallIndustriescorporationwasestablished3rdApril1972.
- →Thebasicobjectiveofthecorporationistoaid, assistand promote the MSMEs in the state for their sustained growth and development to the industrialization process in the state.
- ${\color{blue} \rightarrow} It provides quality raw material and building material to MSMEs of the state.$
- →Itassistsin marketingtheproductsoftheMSMEsector.

4) <u>SIDBI(SmallIndustriesDevelopmentBankofIndia):</u>

- →SmallindustriesanddevelopmentBankofIndiamainlyfocussesonthefinancing,promotion and development of the Micro, Small and Medium Enterprises (MSMEs). It wasestablishedon1990.
- → It offers financial support to MSMEs Small Scale Industries (SSIs) and other servicesectors. →It provides funding via banks and other financial institutions.
- \rightarrow It aims to create equilibrium in the financial sector by strengthening credit flows and promoting skill development.

5) NABARD(NationalBankforAgriculturalandRuralDevelopment)

- →Itwasestablishedin1982.
- →Itisadevelopmentbankfocussingprimarilyontheruralsectorofthecountry.Itisanapex bankinginstitutionto providefinanceforagriculture and ruraldevelopment.
- \rightarrow Itisresponsible for the development of the small industries, cottage industries and any other such village or rural projects.
- →Itpreparesruralcreditplans, annually, for all districts in the country.
- → Italsopromotes research in rural banking, and the field of a griculture and rural development.

- → Incubators provide numerous benefits to owners of start-up businesses, but they carefullyscreenpotential businessesbecausetheirspace,equipmentandfinancesarelimited.
- →Incubatorshavespecialisedideasor businessesso thatgrowthrateisquicker orbetter.

→Theyprovideadministrative support, office equipment, potential investors and training.

ScienceandTechnologyEntrepreneur'sParks:

→ Science and Technology Entrepreneurs Park (STEP) programme was initiated to provide are-

orientationintheapproachtoinnovationandentrepreneurshipinvolvingeducation,training,researc h,finance,managementandthegovt.

- →Themainobjectivesofstetsare:
 - $(a) \ \ To forge a close link age between universities, a cademic and R\&D institutions on one hand and industry on the other.$
 - $(b) \ Toprovide R\&D support to the small-scale industry mostly through interaction with research institutions.$

2NDCHAPTER MARKET SURVEY AND OPPURTUNITYIDENTIFICATION(BUSIN ESSPLANNING)

Are searchmethod for defining the market parameters of abusiness is called market survey.

BusinessPlanning:

- →Thepurposeofabusinessplanistoidentify, describeandanalyseabusinessopportunity of abusinessalready underway, examining its technical, economic and financial feasibility.
- →Moreover, itshouldserve as a business card for introducing the business to others: banks, investors, institutions, public bodies or any other agent involved, when it comes time to seek cooperation or financial support of any kind.
- →Notwobusinessplansaresame.Butthey allhavethesameelements.Belowaresomeofthe commonandkeypartsofabusiness plan.
- * ExecutiveSummary: This section outlines the company and includes the mission statement along with information about the company's leadership, employees, operations and location.
- * **Products and Services:** Here the company can outline the products and services it willoffer, and may also include pricing, product life span, and benefits to the consumer.
- * Market analysis: A firm needs a good handle of the industry as well as its target market. It will outline who the competitor is and how it factors in the industry, along with its strengthsandweaknesses.
- * <u>Marketingstrategy:</u> This area describes how the company will attract and keep its customer base and how it intends to reach the consumer.
- * **Financial planning:** The company should plan its finance and future projections. Financialstatements, balances heets and other financial information may be included for already established businesses.
- * **Budget:** This includes costs related to staffing, development, manufacturing, marketing and anyother expenses related to the business.

Small ScaleIndustries(SSIs):

- \rightarrow The small scale industries are generally comprised of those industries which manufacture, produce and render services with the help of Small machines and less manpower.
- \rightarrow The industries are the lifeline of the economy, especially in the developing countries like India.
- $\rightarrow The seplayan important role in generating employment. Its investment limits houldn't exceed 1 crore.$
- → Examples: Bakeries, School stationaries, water bottles, leather belt, small toys, beautyparloursetc.

CharacteristicsofSSIs:

• **Ownership:**SSIsaregenerallyundersingleownership.Soitcanbeeithersoleproprietorsh iporsometimespartnership.

- <u>Management:</u>Bothmanagementandcontroliswithowners.Hencetheownerisactivelyi nvolvedinday-to-dayactivities.
- <u>Labourintensive:</u>Itsdependenceontechnologyislimitedanduseoflabourismore.
- **Flexibility:**Incaseofadaptingnewthingsornewenvironmentstheyareflexiblethan largeindustries.
 - **<u>Limitedreach:</u>** They can meet their local and regional demand.
 - **Resources utilisation:** They use local and readily available resources which helpstheeconomyfullyutilisenaturalresources withminimumwastage.

Ancillaryunits:

- \rightarrow The term ancillary industry refers to that industry which supports the main industrial activity in a given region or city.
- → Theymanufactureparks, components, sub-assemblies, tools, intermediates, machinesetc.
- →Thesupplyofitsproductsandservicesismorethan50% of its existing products and services.
- →Itincreasesproductivityinsmallscaleindustry.

Tinyunits:

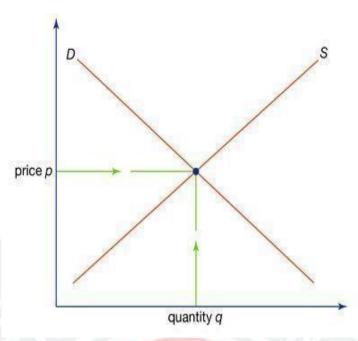

A tiny unit is defined as an industrial or business enterprise whose investment in plantandmachineryisnotmorethanRs 25lakhs.

ServiceSector units:

Activities in the service sector units include retail, banks, hotels, real estate, education, health, social work, computer services, recreation, media, communications, electricity, gasandwatersupplyetc.

Demand and Supply:

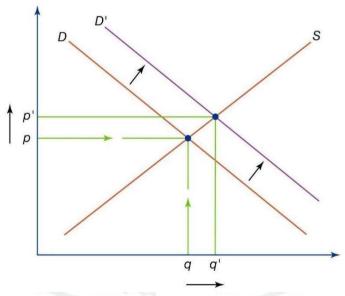

- → Supply and demand, in economics is the relationship between the quantity of a commoditythat producerswishto sellatvariousprices and the quantity that consumers wish to buy.
- \rightarrow Itisthemainmodelof pricedetermination. The price of commodity is determined by the interaction of demand and supply in market.

(Relationshipofpricetosupplyanddemand)

→ **Demand curve**: The quantity of a Commodity demanded depends on the price of that commodity and potentially on many other factors such as, the prices of other commodities, the incomes and preference of the customers and seasonal effects.

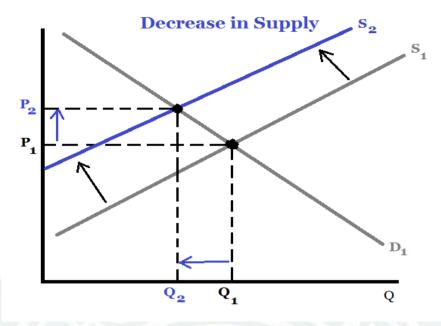

A demand curve is almost always downward-sloping, reflecting the willingness ofconsumerstopurchasemore ofthecommodityatlowerpricelevels.

(Increaseindemand)

→ **Supply Curve:** The quantity of a commodity that is supplied in the market depends not only on the price obtainable for the commodity but also potentially on many other factors, such as price of substitute products, the production technology, and the availability and cost of a bour and other factors of production.

A supply curve is upward-sloping, reflecting the willingness of producers to sell moreofthecommoditytheyproduceinamarketwithhigherprices.

(Decreaseinsupply)

Identifyingbusinessoppurtunities:

- → Spotting market opportunities is essential for business growth and survival. These aretypicallyexternalandincludethingslikeeconomictrends,markettrends,shiftingorexpandingcu stomerbase,changesingovt.andindustryregulations,changesinpartnershiporrelationshipwithsup pliers,competitorsetc.
- → One of the best ways of identifying new businessis SWOT analysis. SWOT analysis isone of most popular strategic analysis tools which focuses on four key factors like strengths, weaknesses, opportunities, threats facing your business.
- →OtherwaystodetectnewbusinessopportunitiesotherthanSWOTanalysis are:
 - **Segment your Consumers:** Divide your customer base into smaller groups that sharecommon characteristics such as age, gender, location, lifestyle, attitude of purchasinghabits. This allows you to analyse the demand for your products or services and targeteachsegment.
 - <u>Analyse your purchase situation:</u>Look at distribution channels, payment methods and other factors around purchasing to understand how your customers buy your products or services.
 - Analyse your competition: Research existing businesses in the market to understandtheir value proposition and their competitive advantage. Establish your unique sellingpointtosetyourselfapartfromyourcompetitors.
 - <u>Look at other markets:</u>Consider carefully what the market is like. To increase the likelihood of success, research the competitors, local habits. and the likely demand foryour products or services.

Stepsinvolvedinfinalproductselection:

Therearethreebasicstages/steps involved in products election-

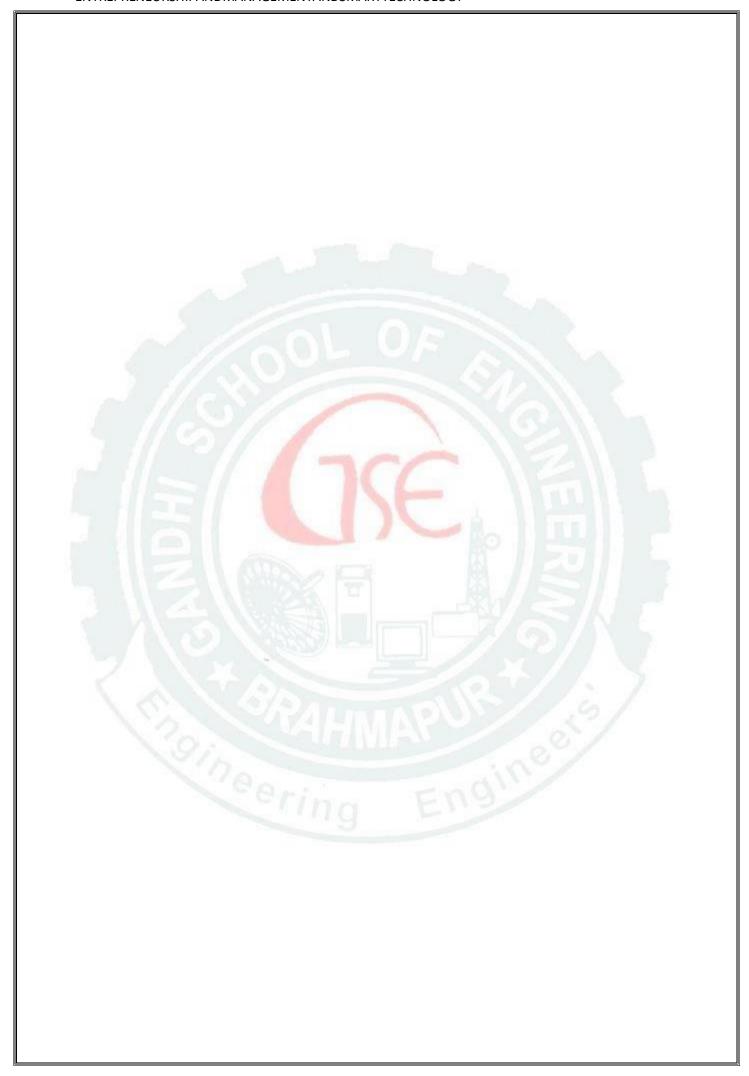

(1) <u>Idea generation:</u> Productideas or investment opportunities come from different sources such as business/financial newspapers, research institutes, consulting firms, natural resources, universities, competitors etc.

- (2) **Evaluation:** Eachidentified product and investment opportunity needs to be adequately evaluated.
- (3) <u>Choice:</u> A choice is made of product which has been found to be commercially viable, technically feasible and economically desirable. At this stage, necessary machinery is set inmotion.

3RDCHAPTERPROJECT REPORTPREPERATION

Preliminary ProjectReport:

- → A Preliminary Project Report is a brief summary of a project describing the expected inputs and outputs like finance, manpower, materials, machinery, technology, expenses, production, profits, sales etc. of a project before the project is actually implemented.
- \rightarrow A PPR is a rough estimate of the projectenvisaged by the entrepreneurbasing on whichhe willmake a detailed projectreportandstartworkingonthe project.
- \rightarrow The entrepreneurs have to submit copies of his PPR to various government agencies andbanks and get provisional registration and approval with an assurance for licence, permission, loanetc.
- →APPRhighlightsfollowingdata:
- (a) Acleardescriptionofproblemorneedofproject.
- (b) Abriefdescriptionofaddressingthesolution.
- (c) Ananalysissummaryofworkrelevant toproject.
- $(d) \ Current state of project work, including activities completed and unfinished.$
- (e) Analysisofprojectincriteriaslikecost-
- effectiveness, feasibility and manageability, performance, others.
- (f) Atimelinewithspecificmilestonesandeventsrelatedtoprojectwork.

4THCHAPTER ManagementPrinciples

Managementisanartofgelling thingsdonethroughother people.

Management is defined as the creation and maintenance of an internal environment inan enterprise, whereindividuals working togetherin groups can perform efficiently and effectively towards the attainment of group goals.

Principles of Scientific management: (management)

* Developmentofeachone'sjob:

(a) Thisprinciplesuggests thatworkssignedtoanyemployeeshouldbeobserved, analysed with respect to each and every element and part and time involved in it.

(b) This can be done by the method of enquiry, investigation, data collection, analysis and framing of rules.

* <u>Scientificselection, Training & development of workers:</u>

- (a) Workersshouldbeselectedandtrainedscientificallytomakethemfitforthejob.
- (b) Physical, mental and other requirements hould be specified for each and every job.

* Cooperationbetweenmanagementandworkers:

- (a) Thereshouldbe no conflict between managers & workers.
- $(b) \ \ The employees should be fully harmonized so as to secure mutually understanding relation between them.$

* Divisionofresponsibility:

Themanagementshould assume the responsibility of planning the work whereas workers should be concerned with execution of task.

Functionsofmanagement:

Themostwidelyacceptedfunctionsofmanagementare:

- 1. Planning
- 2. Organizing
- 3. Staffing
- 4. Directing
- 5. Controlling

(1) Planning:

- → Planning is a systematic thinking about ways and means for a complished of pre-determined goals.
- →Planningisnecessarytoensureproper utilisationofhumanandnon-humanresources.
- →Itisanintellectualactivityanditalsohelpsinavoidingconfusion,uncertainties,risks&wastages.

(2) Organising:

- →Itistheprocessofbringingtogetherphysical, financial and human resources and developing productive relationship amongst them for a chievement of organisational goals.
- ${\color{blue} \to } Toorganise abusiness involves determining and providing human and non-human resources to the organisation alst ructure.$
- →Organizingasaprocessinvolves:
- (1) Identification of activities.
- (2) classification of grouping of activities.
- (3) Assignmentofduties.
- (4) Delegation of authority and creation of responsibility.
- (5) Coordinating authority and responsibility relationships.

(3) Staffing:

- → Itisthefunction of manning theorganisation structure and keeping it manned.
- →Staffing hasassumedgreaterimportanceintherecentyearsdueto advancement oftechnology,increaseinthe size ofbusiness,complexityofhumanbehaviour.
- →Themainpurposeofstaffingistoputrightmanonrightjob.
- →Staffing involves:
- (a) Manpower planning (estimating manpower in terms of searching, choose the person and giving the right place)
- (b) Recruitment, selection & placement
- (c) Training&development
- (d) Remuneration.
- (e) Performanceappraisal
- (f) Promotions&transfer

(4) <u>Directing:</u>

→Directionisthatinter-

personal aspect of management which deals directly within fluencing, guiding, supervising, motivating sub-ordinate for the achievement of organization algorithms.

- →Directionhasthefollowingelements:
- (a) **Supervision:** Itimplies over seeing the work of subordinates by their superiors.
- (b) <u>Motivation:</u> It means in spiring, stimulating, encouraging the sub-ordinates with zeal towork.
- (c) <u>Leadership:</u>Itmaybedefinedasaprocessbywhichmanagerguidesandinfluencestheworkofsu b-ordinatesindesireddirection.
- (d) **Communication:** It is process passing information, experience, opinion etc. from one person to a nother.

(5) Controlling:

- \rightarrow It is the measurement and correction of performance activities of sub-ordinates in order tomakesurethattheenterpriseobjectives and plans desired to obtain the mass being accomplished.
- →Ithasfollowingsteps:
- (a) Establishment of standard performance.
- (b) Measurement of actual performance.
- (c) Comparison of actual performance with the standards and finding out deviations if any.
- (d) Correctiveaction.

Levelsofmanagement:

Mostorganizationshavethreemanagementlevels:

- (1) Top-levelmanagement
- (2) Middle-levelmanagement
- (3) Low-levelmanagement.

(1) <u>Top-levelmanagement:</u>

- → The board of directors, president, vice-president and CEO all are the examples of top-levelmanagers.
- → These managers are responsible for controlling and overseeing the entire organisation. They develop goals, strategic plans, company policies and make decisions on the direction of the business.
- \rightarrow In addition, top-level managers play a significantrole in the mobilization of outsideresources.
- →Top-levelmanagersareaccountabletotheshareholdersand generalpublic.

(2) Middle-levelmanagement:

- $\rightarrow General managers, branch managers, and department managers are all examples of middle-level managers.$
- → Middlelevelmanagersdevotemoretimetoorganizationalanddirectionalfunctionsthantop-levelmanagers.
- →Theirrolescanbeemphasizedas:
- (a) Executingorganizational plans in conformance with the company's policies and the objectives of top management.
- (b) Defining and discussing information and policies from top management to lower management.
- (c) Inspiringandprovidingguidancetolow-levelmanagerstowardsbetterperformance.

(3) <u>Low-levelmanagement:</u>

- ${\color{red} \rightarrow} Supervisors, section heads and foremen are examples of low-$
- levelmanagementtitles. These managers focus on controlling and directing.
- →Low-levelmanagersusuallyhavetheresponsibilityof:
- (a) Assigningemployeestasks.
- (b) Guiding and supervising employeesondayto dayactivities.
- (c) Ensuring thequality and quantity of production.
- (d) Up-channellingemployeeproblems.
- (e) Makingrecommendations and suggestions.

5th ChapterFunctionalareasofmana gement

(A) Productionmanagement

Functionsofproductionmanagement:

Thefunctionsofproductionmamanagementare

- (a) planning
- (b) Routing
- (c) Scheduling
- (d) Loading
- (e) Dispatching
- (f) Followup
- (g) Inspection

(a) Planning:

→ At this stage the management decides the products to be produced. It will also decide theingredients, raw materials, size, colour, shape, quality, specification, quantity of production, costof production etc.

(b) Routing:

- ${\color{blue} \rightarrow} The main aim of routing is to find out the best and cheapest of way of production and decide the best route which will be economical, efficient and less time consuming.$
- → Routing also includes the selection of men, machines and processes to carry out the workinthedesiredmanner.

(c) Scheduling:

→Schedulinginvolvesfixationoftimeanddateforstartingandcompletionofeachoperation and the entireoperations.Italsoincludes the determination of total time requiredforcompletionofeachoperation.

(d) Loading:

 ${\bf \rightarrow} I tis essential to maintain records of the loads assigned. These should neither be over-load or underload of works to anyone.$

(e) <u>Dispatching:</u>

Itincludes:

- →Issueofnecessarymaterials,tools,equipmentandaccessoriestoindividuals,jobs,process,depart mentorsections
- →Issuingnecessary orders for inspections at various stage and to the person to carry on production.

(f) Followup:

Itinvolvesthefollowingprocess:

- →Seethattherawmaterials, equipment etc. reachtheshops in time asper schedule.
- ${\color{blue} \rightarrow} Check the progress of the works and ensure that they are and schedules being done as perplans, routes and schedules.$

(g) Inspection:

- \rightarrow Inspectionisthelaststageofproductionplanningandcontrol. It involves checking the quality of goods produced and ensure that they confirm to the standard.
- \rightarrow Inspectionincludes the appointment of inspectors at various points where the chances of deviation are high.

Productivity:

Productivity is the increase of output from each unit in the production process. Theways of achieving productivity includes the training of workers and the introduction of machinery and equipment into the production process.

Productionplanning&control:

It may be defined as," Coordination of a series of functions according to a plan, whichwill regulate the orderly movement of goods through the entire manufacturing cycle from the procurement of all the material stotheshipping of finished goods at a pre-determined rate."

QualityControl:

Quality Control is a process through which business seeks to ensure that production quality is maintained or improved.

(B) <u>InventoryManagement</u>

Needforinventorymanagement:

- (1) Itprotectsacompanyfromfluctuationsindemand, of its products.
- (2) Ittriestoprotectfluctuations inoutput, from risks and uncertainty.
- (3) Itenablesacompanytoprovidebetterservicestoitscustomers.
- (4) Itkeepsasmoothflowofraw-materials and aids incontinuing production operations.
- (5) Ithelpstominimizeadministrativeworkload, manpowerrequirementandevenlabourcost.
- (6) Itchecksandmaintainstherightstuckandreducestheriskofloss.
- (7) Itmakeseffectiveuseofworkingcapitalbyavoidingover-stocking.
- (8) Ithelpstomaintainacheckonlossofmaterialsduetocarelessnessorpilferage(stealing).
- (9) It facilitatescostaccountingactivities.
- (10) Itavoidsduplication inordering of stuck.

Techniquesofinventorymanagement:

\rightarrow Just-In-Time(JIT):

Just-in-time (JIT) is an inventory strategy companies employ to increase efficiency anddecrease waste by receiving goods only as they are needed in the production process, therebyreducing inventory costs.

Thismethodrequiresproducerstoforecastdemandaccurate.

→ ABCAnalysis:

It stands for "Always Better Control" It is based upon Pareto principle which states that 80% of the overall consumption value is based upon Pareto principle which states that 80% of the overall consumption value is based upon Pareto principle which states that 80% of the overall consumption value is based upon Pareto principle which states that 80% of the overall consumption value is based upon Pareto principle which states that 80% of the overall consumption value is based upon Pareto principle which states that 80% of the overall consumption value is based upon Pareto principle which states that 80% of the overall consumption value is based upon Pareto principle which states that 80% of the overall consumption value is based upon Pareto principle which states that 80% of the overall consumption value is based upon Pareto principle which states that 80% of the overall consumption value is based upon Pareto principle which states are the overall consumption value is based upon Pareto principle which states are the overall consumption value is based upon Pareto principle which is a state of the overall consumption value is based upon Pareto principle which is a state of the overall consumption value is based upon Pareto principle which is a state of the overall consumption value is based upon Pareto principle which is a state of the overall consumption value is based upon Pareto principle which is a state of the overall consumption value is a state o

ABCanalysisisadividingon-

handpopulartechnique for inventory into three categories: A, Band C, based on annual consumption unit, inventory value and cost significance.

A: Itemsofhighvalue(70%) and small innumber(10%)

B: Itemsofmoderatevalue(20%) and moderate in number (20%)

C: Itemsofsmall value(10%) and large innumber (70%)

→ <u>Dropshipping:</u>

Drop shipping provides goods by directdelivery from the manufacturer to the retaileror customers. Here the retailer does not keep goods in struck, but instead transfer customers'orders and shipment details to either the manufacturer, another retailers or a wholesaler whothenships the goods directly to the customer.

→ Cross-docking:

It is a distribution method in which the goods flow in an unbroken sequence from receiving to shipping (dispatching) thus eliminating storage. It is also called as flow throughdistribution.

Ithelpstoachieveacompetitiveadvantage, speedandproductivity of a supply chain.

→**Bulk-shipping:**

It refers to the activity of moving goods or commodities which are not packaged, in large quantities from one place to another is called bulk shipping.

Ex: Examples of commodities that can be shipped in bulkare or es, coal, scrap, iron, vegetable oiletc.

(C)

Financial Management

Functionsoffinancialmanagement:

Therearefourfunctionsoffinance.

- (1) Investmentdelusion
- (2) Financial decision
- (3) Dividenddelusion
- (4) Liquiditydecision.

(1) <u>Investmentdecision</u>:

- \rightarrow One of the most important finance functions is to intelligently allocate capital to long termassets. This activity is also known as capital budgeting. It is important to allocate capital inthose long-termassetssoastogetmaximumyieldinfuture.
- → Since the future is uncertain and there may be many risk involved, so there are manypossibilities to be considered while calculating expected return.

(2) Financial decision:

- →Itisimportanttomakewisedecisionsaboutwhen, whereandhowshouldabusinessacquirefunds. Fundscanbe acquiredthroughmanywaysandchannels.
- →Afirmtendstobenefitmostwhenthemarketvalueofacompany's sharemaximizes. Italsomaximizes the shareholder's wealth.
- \rightarrow Ontheotherhand, the use of debtaffects the risk and return of a shareholder. It is risk ier though it may increase the return on equity funds.

(3) Dividenddecision:

- → Earning profitis a common aim of all business, butthe key function of a financialmanager performs in case of profitability is todecide whether to distribute all the profits to the shareholders or distribute part of the profits to the shareholders and other part to thebusiness.
- → It's the financial manager's responsibility to decide an optimum dividend policy whichmaximizes the market value of the firm.

(4) <u>Liquiditydecision:</u>

- →It is very important to maintain a liquidity position of a firm to avoid insolvency. Firm'sprofitability, liquidity and risk all are associated with the investment incurrent assets.
- → In order to maintain a trade-off between profitability and liquidity, it is important to investsufficient funds in current assets. But since current assets don't earn anything for business,thereforea propercalculationmust be done before investing incurrent assets.

WorkingCapital:

→ Working capital, also known as net working capital, is the difference between a company's current assets, such as cash, accounts receivable and inventories of raw materials and finished goods, and its current liabilities, such as accounts payable.

ManagementofWorkingcapital:

- \rightarrow <u>Cash</u>: Cash is one of the most liquid and important components of working capital. It is needed for performing all the activities of a firm, i.e., from acquisition of raw materials tomarketing of finished goods.
- → **Inventory management:** It represents a complete list of items, such as property, goods in stuck or the contents of a building etc. Efficient management of inventory results inmaximisation of the shareholders.
- → <u>Accounts receivable management:</u> It represents Sundry debtors of afirm. The term receivable is defined as any claim for money owed to the firm from customers arising from sale of goods or services innormal course of business.
- → <u>Accounts payable management:</u> It represents sundry creditors of a firm. It leads tosteadysupplyofmaterials toafirmas wellasenhancesits reputation.

Costing:

Costingisanysystemforassigning coststoanelement of abusiness.

Itisthesystemofcomputingcostofproductionorofrunningabusiness, by allocating expendituret ovarious stages of production orto different operations of a firm.

Break-evenanalysis:

- → Break-even analysis looks at the level of fixed costs relative to the profit earned by eachadditional unit produced and sold. In general, a company with lower fixed costs will have allower break-even point of sale.
- → Break-even point is calculated by dividing the total fixed cost of production by the price of a productper individual unit less the variable costs of production.

BookKeeping:(Double-entry).

- → Whatever may be the reasons, every business has to maintain records of its financialtransactions in a systematic manner. Book keeping is the maintenance of the accounts in asystematicmanner.
- → Book means record and keepingmeansmaintaining. Sobook keepingmeans recordmaintaining.
- → Almost all the business organisation now-a-days maintain accounts under double-entrysystem of book keeping. Under this system, each and every business transaction is recorded twice.
- \rightarrow Under this system, a business usually maintains a number of accounts such as cash A/C,Salary A/C, Rent A/C, Interest A/C, Raw materials A/C, finished goods A/C, MachineriesA/C,BankA/C etc.

Accounts:

- → To facilitate the maintenance of accounts under double entry system of book keeping, allthe accounts havetwosides each.
- → The left side of an account is known as the debit side shortly known as Dr Side and therightside of the accountisknownasthecreditside, shortly known as Crside.

TypesofAccounts:

Itisof3types:

- (1) **Real account:** It refers to all the real things which are visible and tangible, such ascash, machineries, buildings, furniture, materials, finishedgoods, toolandequipmentetc.
- (2) <u>Personal account</u>: It refers to all the accounts of different individuals or persons aswell as artificial persons, like companies, banks, corporate bodies, like, LIC, SBI etc. withwhom the business has credit transactions; both credit sale and credit purchases includingloansandborrowings.
- (3) <u>Nominal account:</u> Itreferstoall theaccounts related to different incomes and expenses, losses and gains. These items are not visible and tangible like rent, interest, salary, commissionetc.

RulesofDebitandCredit:

- (1) Realaccount- Debitwhatcomes in&creditwhatgoesout.
- (2) Personalaccount- Debitthereceiver&creditthegiver.
- (3) Nominal account-Debitall expenses and losses & credital lincomes and gains.

Journal:

- → Allthetransactions are recorded in the journal and for that all the entries made in the journal are known as journal entry.
- →Allthejournalentrieshavetobemadeaspertherulesofdebitandcredit.
- → Sojournalisabookofprimaryentry, where all the transactions are recorded according to the rules of debit and credit.

Example:

- → RentpaidRs.500/-. Here, in this transaction the two accounts involved are therent A/C and cash A/C.
- \rightarrow (a)Rentisanominalaccountandalltheexpenseshereistobedebited. Soitwould bewritten on the debits ide.
 - (b) Cashisarea lac count and it is going out. So it would be also written on the credit side of the cash Alc and the count and

- → Alltheassets are classified into 3 categories: current assets, fixed assets and fictious assets.
- (a) Currentassetsincludes: cashinhand, cashatbanketc.
- (b) Fixedassetsincludes:land,buildings,plant,machineryetc.
- (c) Fictions assets includes: preliminary expenses, extraordinary losses etc.
- \rightarrow Theitems recorded on the capital, reserves and surplus, long term loans, short term loan setc.

(D)

Marketing Management

Market may be described as a designated or specified place or area where business activities such as buying and selling are carried on.

Marketingmanagementfacilitatesthedirectionsofactivities and functions which are involved in the distribution of goods and services.

Marketingtechniques:

The selection of an appropriate marketing technique depends upon the type of product, policy of an organisation, number of customers, location of customers etc.

A norganisation select may any one of the following technique for selling its products.

(a) Forsmallbusinessorganisations:

Themarketingtechniquesusedare:

- 1. Flyers(briefdescriptionaboutbusinesssentviamailboxes)
- 2. Posters(nearshopping malls, public places)
- 3. ValueAdditions(coupons,freeappraisals)
- 4. ReferralNetworks(discounts, rewards)
- 5. Follow-ups(takingSourcesoffeedback)
- 6. Cold calls(throughphoneordoortodoor)
- 7. TheInternet(throughsocialmedia)
- 8. BottomLine(Givepresentations)

(b) <u>BusinesstoBusiness(B2B)marketingtechniques:</u>

SomeoftheB2Bmarketingtechniquesare

- (1) <u>Contentmarketing:</u> This emphasizes education overselling toinfluence buying behaviour. The strategic marketing approach focuses on creating and distributing information relevant to prospects needs in order to attract the product or service.
- (2) <u>Inboundmarketing:</u> Itismosteffective B2B strategy, because it works for businesses of anys ize ortype. It shows strength stoattract, engage customers.
- (3) <u>Socialmediamarketing:</u> It focusses on providing users with content they find valuable and want to share a cross their social networks, resulting in increased visibility and traffic.
- (4) <u>Search engine optimization:</u> It automatically increases your customers in a relevant, targetedway. It is the process of increasing a wareness about a particular website.
- (5) <u>Industry events:</u> In these events, one can demonstrate latest products and services. Itisrarelyopentothepublic.

(c) <u>BusinesstoCustomer(B2C)marketingtechniques:</u>

SomeoftheB2Cmarketingtechniquesare

(1) <u>Social networks and viral marketing:</u> It focusses on providing users with contenttheyfindvaluableandwanttoshareacrosstheirsocialnetworks, resulting inincreased visibility and traffic.

- (2) <u>Paid media advertising:</u> Paidmediais a tool that companies use to grow theirwebsite trafficthroughpaidadvertising.
- (3) <u>Internet marketing:</u> It combines web and email to advertise and drive e-commerces ales
- (4) **Email marketing**: It is highly effective way to nurture and convert leads. It targetsspecificprospectsandcustomerswiththegoalofinfluencingtheirpurchasingdecisio ns.
- (5) <u>Directselling:</u> Itsuggestsmarketingandsellingproductsdirectlytothecustomers.
- **(6) Pont-to-purchase marketing(POP):** It sells to a captive audience, those shopkeepersalreadyin-storeandreadytopurchase.

4p'sofmarketing:

These are the key factors of marketing of goods or service. They are product, price, place, promotion.

- (1) <u>Product:</u> Product refers to a good or service that a company offers to customers. Tobe successful, marketers need to understand the life cycle of a product.
- (2) <u>Price:</u> Price is the cost customers pay for a product. Price can be modified as per thedemandandseasonaleffecttomaximize the business.
- (3) <u>Place</u>: Whenacompanymakesdecisionsregardingplace, they are trying to determine where they should sell a <u>product</u> and how to deliver the product to the market.
- (4) <u>Promotions:</u> Promotionincludesadvertising, public relations and promotional strategy. The goal of promoting is to reveal to customers why they need it and whythey should pay a certain price for it.

(E) HumanResourceManagement

Functionsofpersonnelmanagement:

Therearetwocategories of functions performed by personnel department.

- 1. ManagerialFunction.
- 2. OperativeFunction.

1. Managerialfunctions:

The following are the managerial functions (planning, organising, directing and controlling) performed by a personnel department.

(a) Planning:

- → Planning lays down a predeter mine do our set odos omething such as what to do, how to do, where to do, who to do etc.
- →Throughplanning,mostofthefutureproblems canbeanticipated.

(b) Organising:

→ Itisaprocessbywhichaco-

operative group of human being allocate sits tasks among its members, identifies relationships and integrate sits activities towards common objectives.

→ The personnel manager has to design the structure of relationships among jobs, personnel and physical factors so that the objectives of the enterprise are achieved.

(c) Directing:

- \rightarrow This function relates to guidance and stimulation of the subordinates at all levels.
- → The personnel manager directs and motivates the employees of his department so that theyworkwillinglyandeffectivelyfortheachievementoforganisationalgoals.

(d) Controlling:

- →Itrefers to continuous monitoring of the personnel policies relating to training, labour turnover, wage payments, interviewing new and separated employees etc.
- \rightarrow If deviations are unavoidable, corrective actions can be planned in advance.

2. OperativeFunction:

Thesefunctions are relating to the procuring, developing, compensating, integrating and maintaining a work-force for attaining organizational goals.

(a) **Procurement:**

- \rightarrow This function relates to the procuring of sufficient and appropriate number of persons for carrying out business work.
- →Besidesnumber,theprocurementofsuitablepersonsisalsoessential.

(b) **Development:**

- ${\color{blue} \rightarrow} The development function in concerned with the development of employees by increasing their skill and proficiency in work.$
- → Training programmes are made suitable to cover upde ficiencies in worker's performance.

(c) Compensation:

- \rightarrow Itisconcernedwithsecuringadequateandequitableremunerationtopersonsworkinginthe organisation.
- \rightarrow Compensationshouldbefixedinsuchawaythatitisabletoattractandretainsuitablepersonsintheor ganisation.

(d) **Integration:**

- \rightarrow Integrationisconcerned with the attempt to effect reconciliation of individual, organisation and social interest.
- →Thereshouldbepropercommunicationchannelatalllevels.

(e) Maintenance:

- \rightarrow This function deals with sustaining and improving conditions that have been established.
- ${\color{blue} \rightarrow} The seconditions include establishment of health, Sanitation and safety standards.$

Manpowerplanning:

- \rightarrow Manpower planning in the process of estimating the optimum number of people required for completing project, task or a goal within time.
- → Manpowerplanningincludesparameterslikenumberofpersonnel, differenttypesofskills, timeperi odetc.
- →Itisalsocalledashumanresourceplanning.

Recruitment:

→ Recruitment is a process of searching for prospective employees and stimulating them for applying jo bintheorganisation and choosing recruiting better persons out of them.

Sourcesofmanpowerorrecruitment:

Thesourcesofmanpowermaybebroadlydividedintotwocategories:

- (a) InternalSources
- (b) Externalsources

(a) <u>InternalSources:</u>

Internalsourcesinclude:

- (1) Transfer
- (2) Promotion
- (3) Owntrainingcentres

(1) Transfer:

- →Under this system, recruitment is made by transferring employees from one job or another.
- \rightarrow Transferusually doesn't involveany extra financial benefits to a nemployee. The postor job is usually similar.

(2) **Promotions:**

 \rightarrow Under this system, positions or posts are filled up by individuals from lower grade to higher grade by off ering them promotions of higher posts within the organisation.

(3) Owntraining centres:

 \rightarrow Underthissystem, freshstudentsareselected and are given training invarious skills in their own training gentres.

(b) Externalsources:

Externalsourcesinclude:

- (1) Advertisement
- (2) Campusinterview
- (3) walk-ininterview
- (4) Employment fairorjobmela
- (5) Consultancyorganizations
- (6) Employment exchanges
- (7) Directrecruitment
- (8) Unsolicited applications
- (9) Recommendations
- (10) Labourcontractors
- (11) Placementcell/employmentbeaureu
- (12) Othersimilarorganisations.

SelectionProcess:

→ Selectionisa process which is used as the identification of the tool for procuring human resources based on skill, knowledge, qualification, experience, abilities, talentetc.

Methodoftesting:

Themethodsoftasting include:

(1) **Invitingapplications:**

 \rightarrow The first step in these lection process is to invite applications from the eligible candidates depending on the post and the information required.

(2) <u>Screeningtheapplications:</u>

 \rightarrow Atthisstage, the unsuitable or unfavourable applications may be rejected to make the selection process easy and effective.

(3) <u>Conductingtestsandinterviews:</u>

→Itmayincludewrittenexamination,interview,group-

discussion etc. to test the skill, intelligence, knowledge, aptitude, personality etc.

→ Suchtestsmaybedesigneddepending onthetypeofpersonrequiredforspecificpost.

(4) Conductingphysicalandmedicaltests:

- →Thephysicaltestmayincluderunning, swimming, jumping, diving, cyclingetc.
- \rightarrow Themedicaltestsmayincludeeyetests, ears, heart, kidneyetc. to ensure that there is no organic disease or invalidity in the candidate.

(5) <u>Collectingreferences and checking the antecedents:</u>

- → There is a need of collection of information of a candidate from the list of references.
- ${\color{blue} \rightarrow} There is also a need of checking the past records of the applicant including the report of the local police station where he had been staying in the past.}$

(6) <u>Verifyingthecertificates:</u>

→ After all the above processes are over, the applicant may be called once again with hisoriginal certificates for the purpose of verification to see that the certificates furnished areauthentic.

(7) <u>Issuing of selection letter after final selection:</u>

→ All the successful candidates are to be ranked in order of their merit and final selectionmaybemadedependingonthenumberofpostslyingvacant.

Methodsof traininganddevelopment:

Traininggiventotheemployeescanbeclassifiedinto2categories:

- (1) On-the-jobtraining
- (2) off-the-jobtraining

(1) On-the-job-training:

(a) **Under-studies:**

- \rightarrow This process will enable the traine et ode velophims elfasa capable person to handle the jobs independently.
- →Underthismethod,thetraineeisplacedunderanexperiencedpersonasanassistantwhoistoacquire skill,knowledge,experience.

(b) Coachingbyexpertsontheiobs:

→ Underthismethodthetraineesaretakentothespotswheretheworksarebeingperformed.

(c) <u>Jobrotation:</u>

- \rightarrow Under this system, the trainees get the opportunities of learning different jobs during their employment.
- \rightarrow Thetrainersareperiodicallyrotated from one job to another which is known as job rotation.

(2) Off-the-jobtraining:

(a) Classroomtraining:

- →Underthistypeoftraining,lecturesorinstructorsactastrainers,teachthetopicsandgiveadequatetech nicalandthe theoreticalknowledge aboutthe activitiestobe performed.
- \rightarrow For such training, the remay be use of models, slides, overhead projectors, video, audio, films, computers etc. to train the employees.

(b) Conferences:

→ Under this method a small group of trainees are selected and work together to trainthemselves. Theymakeopendiscussion, exchange ideas and experience, share the knowledge.

(c) WrittenInstructionMethod:

 \rightarrow Under this method,written or printed training materials are supplied to the trainees. The traineesgo

throughthetextsandlearnthetechniques, process, skilletc. for performing jobs.

(d) **Institutionaltraining:**

 \rightarrow There are some specific organisations who have the permanent infrastructure, up to date trainers for the purpose of training.

→So trainers have togo thosespecific centres for training. It is difficult, costly as well as ineffective.

Ex:Trainingpilotsforaeroplanesetc.

(e) **On-linetraining:**

→ Under this method, one can acquire knowledge, skill, talent etc. or train himself with theuse ofcomputerandinternetfacilitiesstayingathishome.

Payment of wages: The organisation and its financial manageris responsible forpayment of wages to each worker employed by him as an employee and paymentshall bepaidbeforetheexpiryofsuchperiodasmaybe prescribed.

6th ChapterLeadershipandmo tivation

(A) Leadership

Leadershipistheartofmotivatingagroupofpeopletoacttowardsachievingofcommongoal.

Need/Importanceofleadership:

The following points justify the importance of leadership in a concern.

- (1) <u>Initiates</u> <u>action:</u>Leaderisapersonwhostarts theworkby communicatingthepolicies and plans to the subordinates from where the work actually starts.
- (2) <u>Motivation:</u> A leadermotivates the employees witheconomic and non-economic rewards and thereby gets the work from the sub-ordinates.
- (3) <u>Providing guidance:</u>Guidance means instructing the subordinates the way they havetoperformtheirworkeffectivelyandefficiently.
- (4) <u>Creating confidence:</u> It can be achieved through expressing the work efforts to thesub-ordinates, explaining them clearly their role and giving them guidelines to achieve thegoalseffectively.
- (5) <u>Building morale:</u> Morale denotes willing cooperation of the employers towards theirworkandgettingthemintoconfidence and winning their trust.
- (6) <u>Building work environment:</u> Human relations shall be keptin mind by a leader. He should have personal contacts with employees and should listen their problems and solvethem.
- (7) <u>Co-ordination:</u> Coordination can be achieved through reconciling personal interests with organisational goals.

Qualitiesofagood leader:

The following are the requisites to be presenting good leader:

- (1) <u>Physical appearance:</u> A leader must have a pleasing appearance. Physique andhealthareveryimportantfora goodleader.
- (2) <u>Vision and foresight:</u> A leader cannot maintain influence when he exhibits that he isforwardlooking. Hehastovisualizes ituations and therebyhastoframelogical programmes.

- (3) <u>Intelligence</u>: Leadershouldbe intelligentenough examine problems and difficults ituations. He should be analytical who weighs pros and cons and then summarizes the situation.
- **(4)** <u>Communicative skills:</u> A leadermustbe able to communicate the policies and procedures clearly, precisely and effectively. This can be helpful in persuation and stimulation.
- (5) <u>Objective:</u> A leader has to be having a fair outlook which is free from bias and whichdoesn't reflect his willingness towards a particular individual. He should develop his ownopinionandshouldbasehisjudgementonfactsandlogic.
- **(6) Knowledge of work:** A leader should be very precisely knowing the nature of workofhissubordinatesbecauseitisthenhecanwinthethrustandconfidenceofhissubordinates.
- (7) <u>Senseof</u> <u>responsibility:</u> Aleadermusthaveasenseof responsibilitytowardsorganisational goals because only then he can get maximum of capabilities exploited in a realsense.
- (8) <u>Self-confidence and willpower:</u> Confidence in himself is important to earn theconfidence of the subordinates. He should be trustworthy and should handle the situationswithfullwillpower.
- (9) <u>Humanist</u>: He has to handle the personal problems of his sub-ordinates with great careandattention.
- (10) <u>Empathy</u>: A leader should understand the problems and complaints of employees and should also have a complete view of the needs and aspirations of the employees.

Functionsofleadership:

Followingaretheimportantfunctionsofaleader:

- (1) <u>Setting Goals:</u> A leader is expected to perform creative function of laying out goalsandpolicies topersuadethe subordinates toworkwithrealandconfidence.
- (2) <u>Organizing:</u> The second function of a leader is to create and shape the organization onscientific lines by assigning roles appropriate to individual abilities with the view to make its various components to operate sensitively towards the achievement of enterprise goals.
- (3) <u>Initiating action:</u> The next function of a leader is to take the initiative in all matters of of of the group. He should not depend upon others for decision and judgement. Heshouldfloatnewideasandhisdecisions should reflectoriginal thinking.
- (4) <u>Coordination:</u> A leader has to reconcile the interests of the individual members of the group with that of the organisation. He has to ensure voluntary cooperation from group inrealizing the common objectives.
- (5) <u>Direction and motivation</u>: It is the primary function of a leader to guide and directmotivate people to do their best in the achievement of desired goals, he should build upconfidence andzealintheworkgroup.
- **(6)** <u>Link between management and workers:</u> A leader works as necessary linkbetween the management and the workers. He interprets the policies and programmes of themanagementtohissubordinatesandrepresents the subordinates interest before the

management. He can prove effective only when he can act as the true guardian of the interests of his subordinates.

ManagerVersusLeader:

BASIS	MANAGER	LEADER
Origin	Apersonbecomesamanagerby virtueofhisposition.	Apersonbecomesaleader onbasis ofhispersonalqualities.
Formalrights	Managerhasgotformalrights in anorganisationbecauseofhisst atus.	Rightsarenotavailabletoaleader.
Followers	Thesubordinatesarethefollowers ofmanagers.	Thegroupofemployeeswhomthe leadersleadsarehisfollowers.
Functions	Amanager performsallthe functionsofmanagement.	Leaderinfluencespeopletowork willinglyforgroupobjectives.
Necessity	A manager is very essential to aconcern.	Aleaderisrequiredto create cordial relation between personworkinginandfororganisa tion.
Stability	Itis morestable.	Leadershipistemporary.
Mutualre lationship	Allmanagersareleaders.	Allleadersarenotmanagers.
Accountability	Managerisaccountable forself andsubordinatesbehaviourandp erformance.	Leadershavenowell-definedaccountability.
Concern	Amanager'sconcernis organizationalgoals.	Aleader'sconcern isgroup goals andmember'ssatisfaction.
Follow	People follow managerbyvirtue ofjobdescription.	Peoplefollowthemonvoluntary basis.
Rolecon tinuation	Amanagercancontinueinofficetill he performshisduties satisfactorilyincongruencewitho rganizationalgoals.	A leader can maintain his positiononly through day to day wishes offollowers.
Sanctions	Manager has command overallocation and distribution of sanctions.	Aleaderhascommandoverdifferent sanctionsandrelatedtaskrecords.Th ese sanctionsare essentiallyofinformalnature.

Styleofleadership:

Leadershipstyleisaleader'sapproach toprovidingdirection,implementingplans,andmotivatingpeople.

Therearethreebasic leadershipstyles:

(1) Authoritarian(Autocratic)leaderships:

Aleaderwhoadoptstheauthoritarianstyledictatespolicyandprocedure, and directs the work done by the group without looking for any meaningful input from them.

(2) Participative(Democratic)leadership:

Theseleaderspracticingtheparticipativeleadershipstyleofferguidancetothegroup, as for their group in put indecision making but retain finals ay.

(3) Delegativeleadership:

Theyofferlittleornoguidancetothegroupandleavedecisionmakinguptothegroup. Theywill onlyprovidenecessarytools and resourcesto complete a project.

(B) Motivation

Motivation can be defined as the driving force behind our actions, fuelled by our desirefor something. It is that internal strength that gets us to move, give 100% to whatever goal orendwe desireofplantoachieve.

Characteristicsofmotivation:

Themotivationholdsthefollowingcharacteristics:

(1) Motivationispersonalandpsychologicalconcept:

Motivation is a personal as well as psychological concept, hence the managers have tostudythementalandpsychologicalaspects ofindividual.

(2) Motivationisaprocess:

Motivation is a process of inspiring, energizing, reducing and activating the employeesfor higher level of performance. This process starts with unsatisfied needs, moves throughtension, drives and goal achievement, finally it ends with the reduction of tension aroused byunsatisfiedneeds.

(3) Motivationisacontinuous process:

Motivation is a continuous ongoing process rather than one shot affair, because anindividual has unlimited wants and needs. As soon as the existing need is fulfilled, anotherwillappear. Hencemotivation should go continuously.

(4) Motivationisacomplexsubject:

Motivation is a complex subject in the sense that the individual's needs and wants maybeunpredictable. Thelevelofneed of aperson depends upon his/herpsychological aspects.

(5) Motivationisgoaloriented:

Motivation should be directed towards the achievement of stated goals and objectives. From the view point of organisation, the goal is to achieve high productivity through betterjobperformance.

(6) <u>IntrinsicandExtrinsicmotivation:</u>

An individual can be motivated either by intrinsic factors or extrinsic factors. Theintrinsic factors include recognition, social status, self-esteem, and self-actualization needswhich are related to inner aspects of individual. On the other hand, the extrinsic factors arephysiologicalandsocialneedssuchasfood, shelter, health, education, salary and benefitsetc.

(7) <u>Positive and negative motivation:</u>

By the term motivation we mean positive motivation which is related to the process of stimulating employees for good performance. The negative motivation is also known aspunishmentwhichis notdesired by the employees

(8) Motivationisbehaviour-oriented:

Asmotivationispersonspecific, it is related with the personal behaviour of an employee. Behaviour is a series of activities under taken by an individual in the organizational work place. The behaviour is directed towards the attainment of goals and objectives.

Importanceofmotivation:

Motivationisaveryimportantforanyorganisationbecauseofthefollowingbenefits. Itprovides:

(1) Putshumanresourceintoaction:

Every concern requires physical, financial and human resources to accomplish the goal. It is through motivation that the human resources can be utilised by making full use of it. This can be done by building willing nessine mployees to work.

(2) <u>Improveslevelofefficiencyofemployees</u>:

The level of a subordinate or employee does not depend upon his qualifications and abilities only. Forgetting best of his work performance, the gap between a bility and willingness has to be filled which helps in improving the level of performance of subordinates. This will result to

- a. Increaseinproductivity
- b. Reducing costofoperations
- c. Improvingoverallefficiency

(3) Leadstoachievementoforganisationalgoals:

Thegoalsofanenterprisecanbe achieved onlywhenthefollowingfactorstakeplace.

- a. Thereisbestpossibleutilization of resources.
- b. Thereiscooperativeworkenvironment.
- c. Theemployeesaregoal-directed and they act in purposive manner.

(4) Buildsfriendlyrelationship:

In order to build a coordinal, friendly at mosphere in a concern, the above steps should be taken by a manager. This would help in \$(1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1) + (1)

- a. Effectivecooperationwhichbringsstability.
- b. Industrialdispute and unrestinemployees will reduce.
- c. Theemployeeswillbeadaptabletothechangesandtherewillbenoresistancetothechange.

(5) LeadstoStability ofworkforce:

Stability of work force is very important from the point of view of reputation and goodwill of a concern. The employees can remain loyal to the enterprise only when they have a feeling of participation in the management. This will lead to good public image in the marketwhich will attract competent and qualified people into a concern.

Factorsaffectingmotivation:

Motivation require a balance of a few factors. Here are the 5 factors we feel are key tocreatingmotivated employees.

(1) Rewardandrecognition:

Recognition for good work has a limited shelf life; praise begins tolose if not accompanied by reward. Exceptional work deserves reward and while recognition is sufficient in certaincases, employees begin to losemotivation if they are not rewarded for extra effort. The aimof rewarding and recognising employees is to encourage and motivate them to exceed within their roles and promote positive behaviours.

(2) Development:

Development is very important for motivating employees; studies have shown that 20% of employers prefer career development opportunities and. Training to monetary reward.

Developmentmakesanemployeeself-

dependent and allows them to contribute more effectively in the work place, it also helps employees to enhance their input to your business.

(3) Leadership:

A good leader has the knowledge of what truly inspires loyal and motivated humans toperform at a high level. It is important that a good leader has reasonable expectations givescreditwhere creditisdue andappreciatestheirstaff.

(4) Worklife balance:

Providing a good work life balance nurtures employees. Motivated employees are lesslikely to take sick days, leave the organisation and will be more prepared to work longerhours.

(5) WorkEnvironment:

Motivated employees thrive in a positive work environment. Effective communicationiscreated through a continuous open dialogue, dependent on trust. Honest and open communication throughout the business is the foundation of creating a workplace. where all employees can thrive.

Theories of motivation:

One of the most important theories of motivation is Maslow's need hierarchy theory. Itis based on human needs. Drawing chiefly on his clinical experience, he classified all humanneedsintoahierarchicalmannerfromthelowertothehigherorder.

(1) Physiological needs:

These needs are basic to human life and hence,includefood, clothing,shelter,air,water and necessities of life. These needs relate to the survival andmaintenance of humanlife.

(2) SafetyNeeds:

Aftersatisfying thephysiologicalneeds, then extneeds feltare called safety and severity needs. These needs find expression in such desires a seconomic security and protection from physical dangers.

(3) SocialNeeds:

Manisasocialbeing. Heis, therefore, interested insocial interaction, companionship,

belongingness etc. It is this socialising and belongingness, why individuals prefer to work ingroupsandespeciallyolderpeople gotowork.

(4) EsteemNeeds:

These needs refertoself-esteem and self-respect. They include such needs whichindicateself-confidence, achievement, competence, knowledge and independence.

(5) Self-ActualisationNeeds:

The term self-actualisation means to become actualized in what one is potentially goodat. In effect, self-actualisation is the person's motivation to transform perception of self intoreality.

MethodsofImprovingmotivation:

Therearetwotechniquestoincreasemotivationamongtheemployees.

- (A) Financial motivators
- (B) Non-financial motivators

(A) Financialmotivators:

Theeconomists and most managers consider money and financial incentives a simport ant motivators. These may be provided in the form of more wages and salaries, bonuses, profits having, leave with pay, medical reimbursements, and company paid in surance or any kind of other things that may be given to employees for performance.

(B) Non-financial motivators:

Thesemotivators are in thenature of better status, recognition, participation, jobsecurity etc.

(i) Recognition:

Every person wants his work to be recognized by his superiors. When he knows thathis performance is known to his boss then he will try to improve it more and more. Therecognition may be in the form of word of praise, a pat on the back, a letter of appreciation, entry in annual confidential reportetc.

(ii) Participation:

Itimpliesphysicalandmentalinvolvementofpeopleindecisionmakingprocess. Participationgivesasenseofaffiliationandaccomplishment.

(iii) Status:

This can be done by way of giving various facilities to the persons. These may besuperiorfurniture, carpetsonthe flood, attachment of peons, personal assistant etc.

(iv) Competition:

In some organisations competitors are used as a motivator. The competitors encouragepersons to improve their performance.

(v) JobEnrichment:

Here the job is made more important and challenging for the workers. It brings moresatisfaction and high morale.

Communication:

Communication is simply the art of transferring information from one place, person ortogrouptoanother.

Importance of Communication:

(1) Thebasisofcoordination:

Themanagerexplainstotheemployeestheorganisationalgoals, modes of their achievement an dalso their terpersonal relationship amongst them. This provides coordination between various employees and also departments. Thus, communication acts as a basis for coordination in the organisation.

(2) Fluentworking:

A manager coordinates the human and physical elements of an organization to run itsmoothlyandefficiently. This coordination is not possible without proper communication.

(3) Thebasisof decisionmaking:

Proper communication provides information to the manager that is useful for decisionmaking. No decisions could be taken in the absence of information. Thus, communication is the basisfortaking the right decisions.

(4) Increasesmanagerialefficiency:

Themanagerconveystargetsandissuesinstructionsandallocatesjobstothesubordinates. All of these aspects involve communication. Thus, communication is essentialforthe quick andeffective performance of themanagers and the entire organisation.

(5) <u>Increasescooperationandorganizationalpeace:</u>

The two-way communicate process promotes cooperation and mutual understanding amongst the workers and also between them and the management. This leads to less friction and thus leads to industrial peace in the factory and efficient operations.

(6) Boostsmorale of the employees:

An efficient system of communication enables the management to motivate, influenceand satisfythe subordinateswhichintumbooststheirmoraleandkeepsthemmotivated.

TypesofCommunication:

It isoftwo types:

(1) Formalcommunication:

Formal communications are the one which flows through the official channels designed in the organisational chart. It may take place between a superior and a subordinate, a subordinate and a superior or among the same cadre employees or managers.

These communications can be oral or in writing and are generally recorded and filed in he office.

It isagainoftwotypes:

(a) **Vertical communication:**

Vertical communication as the name suggests flows vertically upwards or downwardsthrough formal channels. Upward communication refers to the flow of communication

from asubordinatetoasuperiorwhereasdownwardcommunicationflowsfromasuperiortosubordinate.

Application for grant of leave, submission of a progress report, requestfor loans etc.are someofthe examples of upwardcommunication.

Sending notice to employees to attend a meeting, delegating work to the subordinates, informing them about the company policies, etc. are some of the examples of downwardcommunication.

(b) **HorizontalCommunication**:

Horizontal or lateral communication takes place between one division and another. Forexample, a production manager may contact the finance manager to discuss the delivery ofraw materialorits purchase.

(2) <u>Informal communication:</u>

AnyCommunicationthattakesplacewithoutfollowingtheformalchannelsofcommunication nis saidtobe informalcommunication.

The informal communication spreads rapidly, often get distorted and it is very difficult detect the source of such communication. It also leads to rumours which are not true. People's behaviour is often affected by the rumours and informal discussions which sometimes may hamper the worken vironment.

Barrierstocommunication:

The barriers to communication in organisation in organizations can be broadly grouped as follows:

- (1) <u>Semanticbarriers:</u> Suchbarriers result due to use of wrong words, faulty translations, different interpretations etc. Language problem is also included in this type of barrier.
- (2) <u>Psychologicalbarriers:</u> The state of mind of both sender and receiver of communication ref lects in effective communication.

A worried person cannot communicate properly and an angryrecipient cannot understand the message properly.

- (3) <u>Organizational barriers:</u> The factors related to organisational structure, rigid rulesandregulations, authority relationshipsetc. may sometimes act as barriers to effective communication.
- (4) <u>Personal barriers:</u> The personal factors of both sender and receiver may art as abarrier to effective communication. If someone suppress some communication or not ask foranyadvice due tolackofconfidence in the system, then barrieroccurs.

7thChapter WorkCulture, TQM&Safety

Humanrelationshipandperformanceinorganization:

- → A human relation is the relationship between the human resources of the organization. Itincorporates management-employees, employees-employees relationship. It also consists of relationship between the organization 's human resource and outsiders (such as clients, suppliers).
- → Human resource is one of the important assets of an organization. Hence, healthy humanrelation's leads to increased productivity and efficiency. It also plays crucial role in growthandsuccess oftheorganization.
- →Fourfactorsinfluencinghumanrelationsinanorganizationsare:

(1) WorkEnvironment:

Humanrelationistsadvocatedthecreationofapositiveworkenvironmentwhereorganization algoalsareachievedthroughsatisfactionofemployees. Positiveworkenvironments are characterizing by such factors like: goals a clearly stated, incentives are properly used to improve performance; feedback is available on performance decisions, theworkisinteresting and growth oriented.

(2) Work-group:

Work is a social experience and most workers find satisfaction in membership in socialgroups. Unless managers recognize the human relations, at work the productivity will notimprove.

(3) Individual:

The human being is an important segment of the organization. Behaviour of an individual is affected by his feelings, segments sentiments and attitudes.

(4) Leader:

Theleadermustensurefull and effective utilization of all organizational resources toachieveorganizationalgoals. He must be able to adjust to various personalities and situations.

Relationshipwithpeers, superiors & subordinates:

Itisalwaysanexperiencetointeractwiththepeer, superiorand subordinate groups. All the three groups of people give a different feel and learning when we interact with them. **Peers:**

- $(1) \ With the secate gory of people, you can respond and reciprocate to them very easily and very firstly.$
- (2) They are typically either in the same level as us in intelligent quotient or status or family structure. They very have similar problems and emphasize well with each other.

Ex: Colleagues in office, friends, cousins, acquaintances, social circle setc.

Superiors:

- (1) Theyaretheoneswhoarehigherthanusasfarastheknowledgeorexperienceorintellectquotientr elationshipgoes.
- (2) They expect a certain kind of respectful treatment from us, while we deal with them. **Ex:** Uncles, aunts, bosses of bosses, mentors, aged consultants, senior positions in anyway. **S ubordinates:**
- (1) This category open supthes cope of being ament or too thers, as well as taking work from the morhel ping them to cope up.
- (2) Theyarelesseitherbyage, experience, knowledgeorrelationship and that 's why we feel good dealing with the mand sometimes even show the moffour seniority.

TQM(TotalQualityManagement):

Totalqualitymanagement(TQM)isthecontinualprocessofdetectingandreducingeliminating errors in manufacturing, streamlining supply chain management, improving thecustomerexperience, and ensuring that employees are upto speed with training.

OualityPolicy:

- → A quality policy is a brief statement that aligns with your organization's purpose and strategic direction, provides a framework for quality objectives, and includes a commitment to meet applicable requirements as well as to continually improve.
- →Qualitypolicyincorporatesanorganization's vision our mission statement or corevalues.
- \rightarrow Topmanagementisresponsible for establishing, documenting as well as and communicating the quality policy, as well as making it available to relevant interested parties.
- \rightarrow When you are working on document control, make sure that you include your qualitypolicyandqualityobjectives. They must be controlled
- (1) Makingthempartofaprocedure.
- (2) Making thempart ofthequality manual
- (3) Makingthemtheirownnumbered, controlled document.

QualityManagement:

Quality Management is similar with the term Total Quality Management (TQM). Here are the 8 principles of TQM.

(1) <u>Customerfocused:</u>

Nomatterwhichtheorganizationdoes, the customerul timately determines the level of quality.

(2) <u>Total-employeeinvolvement:</u>

Allemployeesshouldparticipateinworkingtowardscommongoals.

(3) Process-centered:

Aprocessisaseriesofstepsthattakeinputsfromsuppliers(internalor external)andtransformsthemintooutputsthatare deliveredintocustomers:

(4) Integrated system:

Anintegrated system connects business improvement elements in an attempt to continuously improve and exceed the expectations of customers, employees and others takeholders.

(5) Strategicandsystematicapproach:

Itincludes the formulation of a strategic plant hat integrates quality as a core component.

(6) <u>Continualimprovement:</u>

Itdrives and organization to be competitive and more effective.

(7) Fact-baseddecisionmaking:

Anorganization continually collectand analysed at a inorder to improve decision making accuracy achieve consensus and allow to be prediction based.

(8) Communications:

Itplaysalargepartinmaintainingmoraleandinmotivatingemployeesatalllevels. It involves strategies, method and time liness.

OualitySystem:

- →Itstandsqualitymanagementsystem(QMS)definedaformalizedsystemdocumentsprocesses,procedures and responsibilities for achieving qualitypolicies and objective.
- →AQMShelpscoordinateanddirectorganizationactivitiesmeetcustomerandregulatoryrequirements and improveits effectivenessefficiencyoncontinuous basis.

Accidentssafety:

Causes:

(1) EnvironmentalCausesaccidents:

Accidents which occur from en vironmental causes refer to those work place accidents happen because of working en vironment.

Commonenvironmentalcauses of accident sinclude-

- → **Poorlighting**: Lowvisibility is common cause of slips, trips and falls.
- → Ambienttemperature: If workplace is too

hot, overheating canoccur. If the work place is too cold, hypothermic canoccur.

- → <u>Airpollution</u>: Breathingissues candevelopifaworkplacehaspoorventilationandorairpollution
- → **Soundpollution:** The sound in a work place can cause in jury toworker's hearing.

(2) MechanicalCausesofaccidents:

These are the factors that refer to machine equipment failure or break down.

- \rightarrow **Brokenordamagedmachine:** Partscanbeeasily brokenordamaged if made of poor-quality metal.
- → **Powerfailure**: Totalorpartial Failure power can lead to serious injury.
- \rightarrow **Fireor Explosion:** Cooling failure or a small spark can lead to a mechanical fireor explosion.
- \rightarrow **Fairwearandtear:** The older machine, the more wear and tear on the parts which can lead to a higher risk of mechanical accident.

(3) Humanfactorsthatcausesaccidents:

Accidentscausedbyhumanfactorsreeferstoincidentsin

whichtheaccidentisdirectlyattributed to the worker involved in the accident.

- → **Poorhousekeeping:** Anunkemptwork-spacecanleadtoslips, tripsandfalls.
- → **Fatigue:** When abody is tired, in jury is, more likely to occur.

- \rightarrow Overexertion: Overexertioninjuries are the most common type of work place in jury.
- \rightarrow **Stress:** Workerswhoarestressedareoftenmoredistracted and of greaterrisk of injury.
- \rightarrow **<u>Dehydration:</u>** It is important to consume enough water to ensure your body functions properly.

Prevention:

- \rightarrow Developing an employees a fetyplan with feedback from all level employees.
- $\rightarrow \! Requiring monthly employee training and promotes a fety awareness with an internal safety committee.$
- →Focusing onskilldevelopmentandeducationofallemployees.
- $\rightarrow Ensuring supervisors are monitoring and reporting measures on the progress of all safety measures.$
- \rightarrow Providing a venue for employees to shares a fely concerns and ideas for improving safety.
- \rightarrow Establishingaplannedmaintenancescheduleforallmachines-

daily, weekly, monthly based on manufacturer suggestion.

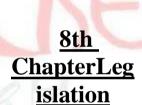

- → Quicklyrepairing and addressingalldefectiveorbrokenmachineparts.
- →Testingallequipmentbeforeuse.
- → Creatingaregularinspectionschedule and put mechanism sin placetoen sureitisadhered to.

GeneralSafetyRules

- 1) <u>Keep work areas clean:</u> Proper housekeeping alone can go a long way in preventinginjuries. Injuries such as ships, trips, falls, sprains, strains etc can be reduced from keepingworkareasorganized and clean.
- 2) <u>Use the proper tool for the job:</u> Avoid the first impulse to use whatever tool (orobject) is around to you get a work task done. Using the wrongtool for the job can resultinaninjuryordamagetothetoolwhichcanleadtoaninjuryinthefuture.
- 3) <u>Always wear the proper PPE for the work task:</u> The lack of PPE, or the use of of of the use of the proper PPE, leads to many injuries work place.
- **4)** Never work on live equipment: Working on energized equipment is an unsafe outthat can result in serious in juries or fatalities.
- 5) <u>Make sure chemicals are properly labelled or stored:</u> Improper labelling and storage can lead to injurie sproperty loss due to fires, Corrosion, etc.
- **6)** Communicatehazards to other personnel: Neverassumethataco-workerunderstandsthehazardsofa taskespeciallyiftheyarenew ornew tothe task.

PersonalProtectiveEquipment:(PPE)

- $\rightarrow Personal Protective Equipment is protective clothing, helmets, goggles or other garments or equipment designed to protect the wearer's body from in jury or infection.$
- ${\color{blue} \rightarrow} The hazards addressed by protective equipment include physical, electrical, heat, chemicals, biohazards and air borne particulate matter.$

IntellectionPropertyRights(IPR):

Intellectual Property Rights are the rights given to the persons overthe creations of their minds. They usually give the creator an exclusive right use of his/her creation for acertain periodoftime.

Patent:

A patent is a right granted to an inventor by the federal government that permits theinventor to exclude others from making, selling or using the invention for a period of time. The patent system is designed to encourage inventions that are unique and useful to society.

Trademark:

A trademark is a type of intellectual property consisting of a recognizable sign, design, or expression which identifies products or services of a particular source from these to others, althoughtrademarks used to identify services are usually called service marks.

Copyrights:

A copyright is a collection of right that reproduce the work, song, movie or software, topreparederivativeworks,to distributecopiesto performand displaythework publicly.

Factoriesact, 1948:

The main objectives of the Indian Factories Act, 1948 are to regulate the working coalitions in factoring to regulate health, safely welfare, and annual leave and enact special provision in respect to young personwomen and children who work in the factories.

Features:

(1) WorkingHours:

- \rightarrow According to the provision of working hours of adults, no adult workers hall be required or allowed to working factory for more than 48 hours in a week.
- →Thereshouldbeaweeklyholiday.

(2) Health:

- \rightarrow Forprotectingthehealthofworkers,thecutkeysdownthateveryfactorshallbekeptcleanandallneces saryprecautions shallbetakeninthisregard.
- →Thefactories should have proper drainage system, adequate lighting, ventilation, temperature etc.
- →Adequatearrangementsfordrinkingwatershouldbe made.
- ${\color{blue} \to} Sufficient latrine and urinals should be provided at convenient places. These should be easily access ible to workers and must be kept cleaned.$

(3) <u>Safety:</u>

- →Noyoungpersonmachineshallworkatanydangerousmachine.
- ${\color{blue} \rightarrow} The reshould be provision of manholes of a dequate size 50 that in case of emergency the workers can excape.$

(4) Welfare:

- → Adequate and suitablefacilities forwasting should be provided and maintained for the use of workers.
- → Facilities of storing and drying, clothing, facilities for sitting, first-aid appliances, shelters, restroom and lunchrooms should be there.

(5) Penalties:

Ifanyrules madeundertheactisviolated,

itistreatedanoffence. The following penalties can be imposed-

- (a) Imprisonmentforatermwhichmayextendto oneyears.
- (b) Finewhich may extend to one lakhrupees, or
- (c) Bothfineand imprisonment.
- →Ifaworkermisusesanappliancerelatedtowelfare,safetyandhealthofworkers,orinrelationtodischar ge ofhisduties,hecanbeimposedapenaltyofRs.500/-.

PaymentofWagesAct,1936:

- → Thisoutisapplicabletoallpersonsemployed, whether directly or through contractors, in a factory or certain specified in dustrial or other establishment.
- ${\color{blue} \rightarrow} The central government is responsible for enforcement of the actin Railways, mine so il fields and air transport services.$
- \rightarrow The stategovernmentare responsible for it all other establishment (factories and other establishments).
- →TheActdoesnotcoverthosewhosewageisRs.24,000/-or more permonth.

Features of the Act:

(1) Obligations of Employees:

Every employer is responsible for the payment wages to all the employees that beemploys. Additionally, apartfrom the employer, all the persons on a med/persons or esponsible to the employer / the person so nominated shall also be responsible for such payment.

(2) Wageperiod:

Every person responsible for wage payment shall for periods in respect of which suchwagesshallbe payable. Nowage periodshallexceedone month.

(3) <u>Timeandmadeofpaymentofwages:</u>

- →Every
- establish menthaving employees in excess of 1000 persons hall pay the wages before the expiry of the 10 th day
- →Allotheremployersshallmake thewagepaymentbytheexpiryof7thday.
- \rightarrow Employersshallmakethepaymentof wagesincurrentcurrencynotesiscashorviabanktransfer.

(4) <u>DeductionsfromWages:</u>

- →Employersshall ensurethatwagesare paidtoall employeeswithoutdeduction of anykindexceptthoseauthorizedbyonunderthisAct.
- \rightarrow Deductionincludes the reduction of wages for the following: Fine, Absence from duty, adjustmento foverpayments of wages, etc...

InternetofThings(IOT):

- → Internet of Things (IOT) is defined as a dynamic global network infrastructure with self-configuring capabilities based on standard and interoperable, communication protocol wherephysical and virtual things have identities, physical attributes and virtual personalities, useintelligentinterface and seamlessly integrated into the information network.
- → Internet of things (IOT) describes the network of physical objects- "things" that are embedded with sensors, software, and other technologies for the purpose of connecting and exchanging data with other devices and systems over the internet.

HowIOTworks:

- →An IOT system consists of sensors / devices which talk to the cloud through same kind ofconnectivity.
- →Once the data gets to the cloud, software processes it and then might decide to perform anaction such as sending on alert or automatically adjusting the sensors / devices without theneedoffortheuser.

ComponentsofIOT:

The 4 fundamental components of IOT system, which tells us how IOT works.

(1) Sensors/Devices:

- → Sensor help in collecting, very minute data from the surrounding environment, All of this collected data can have various degrees of complexities.
- →A device can have multiple sensors that can bundle together to do more than just, sensethings. → For example, our phone, is a device that hasmultiple sensors such as GPS, accelerometer, camerabutour phone does not simply sense things.

(2) Connectivity:

- →Thatcollecteddataissenttoacloudinfrastructurebutitneeds, amediumfortransport.
- → The sensors can be connected to the cloud thorough various mediums of communication and transports such as 'cellular networks, satellite networks, Wi-Fi, Bluetooth, wide-areanetworks(WAN)alc.

(3) **DataProcessing:**

- →Once the data is collected and it gets, the cloud, the software performs processing on theacquireddata
- →This can range from something very simple, so as checking that the temperature reading ondevices suchasACheaters withinanacceptable range.

(4) <u>UserInterface:</u>

- →A user sometimes might have interface through which they can actively check in their IOTsystem.
- →For example, user has camera installed his house, might want check the video recordings and all feeds through a webserver.

CharacteristicsofIOT:

Thereare7crucial10Tcharacteristics:

- (1) <u>Connectivity:</u> With everything going on in IOT devices and hardware, with sensorsandotherelectronicsandconnectedhardwareandcontrol systemsthereneedstobeaconnectionbetweenvariouslevels.
- (2) <u>Things:</u> Anythingthatcanbetaggedor connectedas such asits designed to be connected. From Sensors and household appliances to tagged livestock. Devices can contain sensor or sensing materials can be attached to device and items.
- (3) <u>Data:</u> Data is the glue of the Internet of Things, the firststep towards action and and intelligence.
- (4) <u>Communication</u>: Devices get connected so they communicate data and this data canbe analysed. Communication can occur over short distances or over a long range to very longrange.

Ex-WiFi,LPWA networktechnologiessuchasLoRa onNB-IoT.

- **(5)** <u>Intelligence:</u> The aspect of intelligence as in the Sensing capabilities in IOT devices and the intelligence gathered from bigdata analytics.
- **(6)** Action: This can be manual action, action based upon debates regarding phenomena (for instanceinsmartfactorydecisions) and automation, often the most important piece.
- (7) <u>Ecosystem:</u> The place of the Internet of Things from a perspective of other technologies, communicative, goals and the picture in which the Internet of Things fits. The internet of everything dimension and the platform dimension and the need for solid partnerships.

CategoriesofIOT:

IOTcanbedividedinto3categories:

- (1) <u>Consumer</u> <u>IOT:</u>Itincludestheconnecteddevicessuch assmartcares,phones,watches,laptops,connectedappliancesandentertainmentsystems.
- (2) <u>Commercial IOT:</u>It includes things like inventory controls, device trackers, and connected medical devices.
- (3) <u>Industrial IOT:</u>Itcovers such things, as connected electric meters, waste watersystems, flow gauges, pipeline monitors, manufacturing robots and other types of connected industrial devices and systems.

ApplicationsofIOT:

SmartCities:

Smart city is a city that uses technology to provide services and solve city problems. Smartcitydoesthingslikeimprovetransportationandaccessibility,improvesocialservices,promot e sustainability,andgiveits citizensavoice.

ApplicationsofSmartCities:

SmartParking: Monitoring of parking spaces availability the city.

Structural health: Monitoring of vibrations and material conditions in buildings, bridges and historical monuments.

Noiseurban Maps: Soundmonitoringin barareasand centric

zonesinrealtime. **Smartphone DetectIon:** DetectIphone and Android devices in general any device which works and wifior Blue to other terfaces.

ElectromagneticFieldlevels: Measuremento fthe energy radia ted by cellstations and wi-firouters. **TrafficCongestion**: Monitoring of vehicles and pedestrian levels to optimize driving and walking route

Lighting:Intelligent andweatheradaptive lightinginstreet lights.

WasteManagement: Detection of rubbishlevels in containers to optimize the trash collection routes. **SmartRoads:** Intelligent Highways with warning messages and diversions according to climatic conditions and unexpected events like accidents or traffic jams.

SmartTransportation:

These technologies aim to provide innovative services relating to different modes oftransport and traffic management and enable users to be better informed and make safer and smarteruse of transport networks.

ApplicationsofSmarttransportation:

Wirelesstechnology: Smartmobiledevices are used in route planning, navigation Carpooling and parking information cellular phone systems such as Wi-Fi, and Bluetooth, create a field of data connectivity.

Sensing technology: With sensor, RFID, and other connected technologies, it is feasible toconnect everything (traffic lights, road signs etc.). These sensors are used, in sensor-enabledconsumerdevices.

GPS: A navigation system such as global picturing system (GPS) allows the user to find thebestroutebasedonreal-timeconditions.

SmartVehicles:TransportationInfrastructure(consistingoftrafficlightsandcameranetwork) can help autonomous vehicles find their way. Vehicle-to-Vehicle Communicationswillenable autonomous vehiclestoCommunicate inrealtimeit

Electric vehicles: Electric vehicles need power charging infrastructure which will compose of charging stations and diverse vehicles. Drivers can charge their vehicles at homes, officerooms, changing stations, public places etc.

SmartHome:

A smart home refers to a convenient home setup where appliances and devices can beautomatically connected controlled remotely from anywhere with an internet connection using a mobile or those networked.

ApplicationsofSmartHome:

Heating, ventilation and air conditioning (HVAC): It is possible to have remote control ofall home energy monitors over the internet incorporating a simple and friendly user interface. **Lighting control system:** A smart network that incorporates communication between variouslightingsysteminputs and outputs, using one ormore control computing devices.

Occupancy aware control system: It is possible to sense the occupancy of the home usingsmart meters and environmental sensors like CO₂ sensors, which can be integrated into thebuilding automation system to trigger automatic responses for energy efficiency and buildingcomfortapplications.

Appliancecontrol: Useofsolar panel stoelectricity.

Home robots and security: A household security system integrated with a home automation an provide additional services such as remote surveillance of security cameraover thein ternet access control and central locking of all perimeter doors and windows.

- →Leakdetection, smokeandCodetectors.
- →Indoorpositioningsystems(IPS)
- → Homeautomation for the elderly and disabled.
- →Smartconnectedcooking.
- ${\color{blue} \rightarrow } Voice Control devices like Amazon Alexa or Homeus ed to control home appliances or systems.$

SmartHealthcare:

Smart healthcare is defined by the technology that leads to better diagnostic tools, bettertreatment, for patients and devices that improve the quality of life for everyone.

Applications of Smarthealth care:

The service targets of smart healthcare can be roughly divided into three categories: Clinical /scientific research institutions, regional health decision-making institutions and individualfamilyusers. The application of smarthealthcare can be divided as follows:

Assisting diagnosis and treatment: With the application of technologies such as artificialintelligence, surgical robots and mixed reality, the diagnosis and treatment of diseases has become more intelligent.

Healthmanagement: Itemphasizes real-timeself-monitoring of patients, immediate feedback of health data, and timely intervention of medical behaviour. The emergence of wearable smart devices, smart homes and smart health information platforms connected by IOT technology provides a solution to this situation.

Disease perseverations and risk monitoring: Here the new disease risk prediction modalcollects data through wearable device and smart apps, uploads them to the cloud through

an etwork and an alyses the results based on big databased algorithms to feed back the predicted results to users in real time via short massage.

Virtual Assistants: Virtual assistants communicate with users through techniques such asspeech recognition, rely on big data to obtain information sources, and respond according touser's preferences on needs after calculations - Microsoft Crotona, Google Assistant, AppleSiriareallvirtualassistants.

Smart hospitals: In hospital management, the information platform that integrates multipledigital systems based on the IOT connects digital devices, intelligent buildings and personnel. **Assisting drug research**: Clinical trials of drugs involves the combined use of the IOT, bigdata, and artificial intelligence.

SmartIndustry:

SmartIndustrystandsforradicaldigitalization, connecting products, machines and people, and the use of new production technology.

Applications of Smart Industry:

- → Automated and remote equipment management & monitoring.
- → Predictive maintenance
- → Fasterimplementation of improvements.
- →Pinpointinginventories.
- →QualityControl.
- → Supplychainoptimization
- → Plantsafelyimprovement (monitoring of equipment & damages, plantair quality, frequency of illness)

SmartAgriculture:

Itreferstotheusageoftechnologieslikeinternetofthings, sensor, location systems, robots and artificialintelligences on your farm.

ApplicationsofSmartAgriculture:

Climaticconditions: Sensorsareplacedinsideoutsidetheagriculturalfields. Theycollectdatafrom the environment which is used to choose the right climatic conditions.

Precisionfarming: Itrefers tosmartfarmingapplications such as livestock monitoring, vehicle tracking, field observation and inventory monitoring.

Smartgreenhouse: Using solar-powered IOT sensors build modern and in expensive greenhouses. **Data Analytics:** This helps in an alysis of weather conditions, livestock conditions and coop conditions. **Agricultural Drones:** This is used for cropheal the ropmonitoring, planting, crops praying and field a nalysis.

SmartEnergyManagementSystem:

Itallowsthecoordination amongsensorsandlightstoautomatically keeplightsoffwhen notrequired. The systems alertusersinreal-time whenthelightbulbs goout.

Application:

Smart lighting: Smart LEDS can send information as well as receive command. **SmartEnergy meters:**

Itallowstodetectanyfaultybillschargedbyutilityproviders. **Officedevicemonitors:** Large officebuilding usetheseforsaving energy.
